

Special Notification: Preparation for Construction on Penn Avenue

Construction for the Penn Avenue Improvements Project will begin in spring 2018 and last through Early 2019. Metro Transit, Hennepin County and the City of Minneapolis have come together to make roadway improvements and enhance transit service and safety along Penn Avenue.

Construction activities will include:

- Reconstructing Penn Avenue between West Broadway Avenue and Lowry Avenue
- Rebuilding the street at five key intersections
- Building C Line rapid bus stations
- Making improvements for pedestrians
- Enhancing landscaping, lighting and other streetscape elements
- Replacing and upgrading utility infrastructure like watermain and sewer pipes

We know that construction can be inconvenient for our neighbors and hope to work with you to learn of any special considerations as we prepare for the construction season. As a starting point, we are asking that residents and business owners complete the enclosed short questionnaire designed to help us learn if there are ways we can lessen the inconveniences of construction, communicate with neighbors effectively, and accommodate any special considerations if possible.

After you complete your questionnaire, please mail it back in the enclosed envelope or you may email your responses to penn@metrotransit.org. Project outreach staff may contact you after we receive your survey to follow-up.

Project partners are working hard to coordinate communications on the many components and activities related to this project. Please be aware that you may receive a letter from Metro Transit regarding service planning for the Route 19. Additionally, some residents will receive a letter from the City of Minneapolis regarding assessment for portions of the Penn Avenue reconstruction segment.

If you have any immediate questions regarding the enclosed questionnaire or the Penn Avenue Improvements Project, please contact Karyssa Jackson, penn@metrotransit.org or **612-349-7396**. For continued updates on the Penn Avenue Improvements Project, please sign up for the updates at www.metrotransit.org/c-line-project.

Thank you,

Karyssa Jackson
