What do stations look like?

A Pylon markers help riders identify stations from a distance.

B Real-time NexTrip displays provide bus information, and on-demand annunciators speak this information for people with low vision.

C Utility boxes near station areas house necessary communications and electrical equipment.

D Shelters provide weather protection and feature on-demand heaters and integrated lighting. Shelter sizes will vary based on customer demand (small shown here).

E Ticket machines and fare card validators collect all payment before customers board the bus.

F Emergency telephones provide a direct connection to Metro Transit security. Stations also feature security cameras.

G Stations feature trash and recycling containers.

H Platform edges are marked with a cast-iron textured warning strip to keep passengers safely away from the curb while the bus approaches. Many stations also feature raised curbs for easier boarding.

I Platform areas are distinguished by a dark gray concrete pattern.

J Some stations have sidewalk-level light fixtures to provide a safe, well-lit environment. Fixtures will match existing lights in the surrounding area.

K Benches at stations provide a place to sit.

L Stations have bike parking loops.
